

PROFESSIONAL DIPLOMA IN INTERIOR DESIGN AND DECORATION

A Diploma of Interior Design and Decoration provides the technical skills, industry knowledge and understanding of design processes that shape the environments in which we live, work, shop and eat. It builds a foundation of industry knowledge, under the guidance of academics and industry professionals.

This diploma gives accreditation for further study or a career in the field. The Diploma of Interior Design is for those who wish to work in the interior design and decoration industry. Interior designers and decorators deal with the design of interior spaces in retail, domestic and exhibition spaces. In addition to spatial design and organisation, the interior designer and decorator will plan and create furniture, fittings, surface and colour schemes for a range of architectural contexts.

This qualification describes the skills and knowledge required to perform design and decoration advice for building interiors. Design and decoration at this level covers the development of complete decorative schemes for the effective use of residential and commercial or institutional interior spaces, working with a client brief and within project parameters. It may also include specialist design areas, such as facilities for people with disabilities and the aged.
